

January 30, 2021

Dear Family & Friends of St Joseph Residence,

As usual, this update has both good and unwelcome news.

On the last staff testing a C.N.A. from the night shift was positive and she had worked the night before. So, all the SNF Residents had to go back on quarantine. It was a hard pill to swallow.

But the good news is that all the SNF Residents tested negative on Thursday. We are also hoping to welcome CVS on Tuesday, February 2 for a second round of Pfizer vaccinations. There were no untoward reactions to the first vaccines, so we can hope for more of the same this week,

We have started to receive new Residents again. They have to begin with the quarantine but seem okay with it.

Hope that all is well with you and yours, even in these very cold winter days. Be assured of our grateful thoughts and prayers.

Always grateful,

Sr. Genevieve Regina & Little Sisters
